Connect the 2 wires to receiver MUTE or receiver mute relay terminals.

Connect these 2 wires to a \(\frac{1}{4}\)" mono plug then insert the \(\frac{1}{4}\)" plug into the rear HG-10/10B or VF-1 rear panel VFO KEY socket.

The above Receive, Antenna, and Transmitter connections are made to 3 SO-239 sockets mounted on a metal enclosure.

**Note:**
Relay is shown NOT energized.
