

**Kenwood TS-520S  
CAR Unit board  
to  
GENERATOR Unit board  
Measurement**

**The top probe connects to the GENERATOR board "CAR" terminal. The bottom probe connects to the CAR board's "OUT" terminal. The 2 boards are accessible below the chassis as shown in the picture below. The 2 probes are connected to a dual trace scope not shown in the picture.**

**The TS-520S on it's left side allowing access to the boards below the chassis. Note the HV filter capacitor terminals are VERY CLOSE to the CAR and GENERATOR board connections. Use CAUTION when making and removing the scope probe connections.**
